

Professional Summary

B. Tech graduate in Electronics & Telecommunication Engineering from VIIT Pune (2025), with hands-on experience as an **AI/ML Intern** at Tata Motors. Proficient in **Python, ML, Flask, SQL, and Cloud Tools**, with a strong foundation in **Software Development** and **Data Analytics**. Developed production-level web interfaces and dashboards during internship. Seeking full-time opportunities as a Machine Learning Engineer, Software Developer, or Full Stack Engineer.

Education

- Vishwakarma Institute of Information Technology, Kondhwa, Pune** **2021-2025**
B.Tech. - Electronics & Telecommunication | CGPA: **8.05**
- Decent Junior College, Sadar, Nagpur** **2020-2021**
HSC – Science | Percentage: **95.83%**
- SFL Highschool, Dhamangaon, Amravati** **2018-2019**
SSC – Semi-English | Percentage: **88.60%**

Work Experience

- AI/ML Intern – TATA Motors, Pune (On-site) | [Link](#)** **Dec 2024 – June 2025**
- Developed an AI-based task allocation system to optimize supervisor lineup time, improving shop floor efficiency.
 - Created a Vehicle Component (VC) Tracker to monitor real-time component status across manufacturing stages.
 - Built a MASOP (Manufacturing SOP) dashboard for the Tata Winger body-building process.
 - Learned and implemented **HTML, CSS, and JavaScript** to build responsive web interfaces for these AI systems.
 - Collaborated with other factories to solve real world problems.

Skills

- Programming Languages:** Python, C++, SQL, JavaScript
- Web Development:** HTML5, CSS3, Flask
- Machine Learning & AI:** Scikit-learn, Pandas, NumPy, TensorFlow, Keras
- Dashboarding & Visualization:** Power BI, Microsoft Excel, Matplotlib
- Cloud & DevOps:** AWS, Git, GitHub, CI/CD
- Databases:** MySQL, SQLite
- Tools & IDEs:** Jupyter, Postman, VS Code, Microsoft 365 Apps
- Soft Skills:** Team Collaboration, Project Management, Leadership, Adaptability, Communication

Academic Projects

- Brain Tumour Detection using CNN | [Link](#)**
Tools: Python, TensorFlow/Keras, OpenCV, Tkinter
 - Developed a deep learning-based system to classify brain tumours from MRI images into four categories: glioma, meningioma, pituitary tumour, and no tumour.
 - Designed and deployed a Tkinter-based GUI for real-time image classification with image preview and confidence score.
- Image Deblurring using Deep Learning | [Link](#)**
Tools: Python, TensorFlow
 - Built a deep learning interface that restores sharpness to blurred images using an autoencoder-based model.
 - Implemented noise reduction and deconvolution techniques, improving image clarity in test cases by ~30%.
- Hotel Management System – Full Stack Web Application | [Link](#)**
Tools: HTML, CSS, JavaScript, Flask (Python), SQL (SQLite), Bootstrap
 - Designed and developed a full-stack hotel management that allows hotel staff to manage bookings, rooms, customers, through a secure web interface. Added dashboard visualizations and integrated a relational database for data storage.

Certifications

- IBM Full Stack Software Developer - [Coursera](#)**
- IBM DevOps and Software Engineering - [Coursera](#)**
- Python for non-programmers – [LinkedIn Learning](#)**
- C++ Programming – [LinkedIn learning](#)**
- Data Structures and Algorithms – [Infosys Springboard](#)**
